

MINOX BL HD BINOCULARS

MINOX, the renowned German optics manufacturer based in Wetzlar, has redesigned and added more features to its popular 8x44 mm and 10x44 BL HD binoculars designed for nature watchers and hunters alike.

The newly designed 44 mm BL HD now boasts higher contrast, an exceptionally large field of view and a further reduction of stray light, all of which combine to deliver an unparalleled viewing experience.

In addition, the open design of the BL HD range ensures reliable one-handed operation that allows more freedom of movement and a better grip – an especially useful feature for use in difficult weather conditions or on challenging terrain.

The MINOX BL HD features a powerful optical system with multicoated lenses that guarantee superb optical performance and neutral colour rendition of the object in view. The objective lenses incorporate premium HD glass for enhanced colour correction and higher light transmission, while the phase correction coating of the roof prisms ensures exceptionally detailed image rendition and high contrast, even in poor light conditions.

Users who wear glasses will also benefit from the extended eye relief that keeps the large field of view clear and free from vignetting, while rotating eyecups with individual click stops offer easy adjustment. The MINOX 44 BL HD also comes with a neoprene strap and robust carrying case.

Made in Germany at the state-of-the-art MINOX production facility in Wetzlar, the 44 BL HD binoculars are subject to MINOX's rigorous quality control program.

In addition, users also benefit from the MINOX 30-year warranty against manufacturing defects and functional failures.

The scope of delivery of the new BL HD binoculars includes a neoprene strap and an ever-ready case.
